

Sambalpur Ring Road

All set to get wide & two lane road

Widening of the 4.05 Km Ring road which starts from Mandlia and ends at Nelson Mandel square has already been taken up by the Irrigation Department to make it a two lane road.

The existing single lane road, constructed long back in 1997 has been used by the outside tourist as the major passage to reach the historic Samaleswari Temple situated near Mahanadi River bank. The road also assumes importance as it provides an alternative passage to approach the NH. The ride is all set to be more pleasant and smooth once the project is completed.
