As part of our endeavor to reach out to the community and create vibrant spaces within SMC area .SMC has developed this park under AMRUT. One of the major components in this park is child friendly play equipments. There is nothing better than the laughter of children at play. This initiative is a testament to our quest to create value located in the common green space. As soon as the `ribbon-cutting ceremony' was over the children excitedly rushed into the Park eager to try out various swings and rides.

Creating green spaces in urban areas constitutes a significant improvement in the quality of the environment and people's living conditions. There are leisure spaces and meeting places for all ages and all social categories, encouraging different sectors of the population to mix and integrate. These parks meet the needs of many city-dwellers wanting to relax in a natural environment. These urban parks are a vital public facility. Our goal was not just to build a major environmental infrastructure and a central attraction for inhabitants and visitors, but also to create a cultural space contributing to the city's economic and social development.

Finally, sport has always been popular within the people and remains one of the Park's strong points with the building of a huge sports centre, along with fitness trails featuring specialist equipment for gymnastics, running, cycling and climbing. Here in AMRUT parks we are providing these facilities.

We would like to thank you again for joining with us at this important moment – a time of satisfying completion, and of profound connection – across cultures, across generations and across the ages. Now the park is open for public for their use.
